

CMV300 EVALUATION KIT

EVALUATION BOARDS

The CMV300 eval kit can be used for testing and verifying the operation and image quality of the CMV300 image sensor.

The following components

are present when the CMV300 test system is delivered. CMV300 aluminium case with PCB + CMV300 sensor, lens c-mount spacers (5mm and 10mm), 2 x CameraLink cables MDR - SDR (2m), Camera tripod, NI PCI1433 frame grabber card (inside PC), Lenovo ThinkCentre mini tower model + software + keyboard + mouse, CD with documentation (including schematics and VHDL) and software. The system allows the users to evaluate all aspects of the CMV300 with full access to the sensor registers. Single or multiple image grabbing and saving is possible in multiple formats. Color processing is not supported by this evaluation system. The system is offered as a rental system or can be purchased. In case a system is purchased a sensor must be purchased separately. For pricing, lead time and order information, please contact info@cmosis.com.
